

# Backlit Quick Fab™

We are proud to announce  
the first ever fabric backlit  
pop up display.

Our exclusive lighting  
system creates images with  
color and pop far beyond  
what traditional front lit  
systems achieve.

# Backlit Quick Fab™

## quality & value

Our Quick Fab™ is built from the highest quality components combined with a wrinkle resistant fabric graphic that stays attached to the frame. The ability to backlight the fabric graphic, makes this the most reliable and versatile fabric pop up on the market.

Backlighting is available for the 4x3 Curve display.

## lighting fixtures

Our exclusive Light Blanket creates a uniform glow to illuminate and draw attention to your graphics. Lighting fixtures use standard bulbs that can be found at most hardware stores. Light Blankets are easy to attach, simply connect the Velcro tabs on the blanket to the Velcro tabs on the hubs of the frame. Only one plug is required and will work with any standard outlet.

Frame can be used with or without the light blanket. Lighting packages can also be added to existing frames.

## portable & lightweight

The Backlit Quick Fab™ is easy to set up - the display can be set up by one person in five minutes, with no tools. The entire display, including the lights, collapses into a sturdy rolling hard case for convenient storage and mobility. Lights are wrapped in a protective fabric sleeve.

\* End caps will have slight shadows that are created from the cross bars.

Hubs on flat frame may create a small thin shadow on the graphic.

Grab customers' attention!  
It has never been easier or more economical to own a 10 ft backlit display.
